FNPT solutions for AT0's

FNPT II MCC certified

Use the A11 Mix in your integrated and modular courses (IR / PPL / CPL / ATPL / MCC / IRI / MCCI / STI / FI).

reconfigurable

The A11 Mix can be configured to different aircrafts according to your training needs.

low cost

A cost-effective solution to meet your financial and quality requirements.

maintenance & certification support

Simulator covered by a comprehensive after-sales service. We offer support for the initial and recurrent certification.

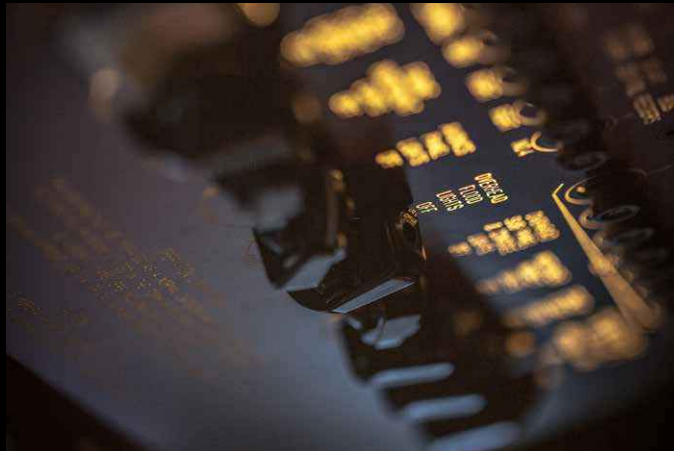

Twin turboprop based on the B200 - FNPT II MCC

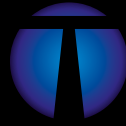

The B200 is a twin-engine turboprop equipped with advance cockpit and systems. It is an efficient training platform for MCC operation, practice B200 normal & emergency procedures and learning how to manage advance avionics.

Twin turboprop based on the B200 - FNPT II MCC

Twin piston based on the PA-34 - FNPT II

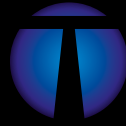

One of the most famous twin-engined light aircraft in the world. Optimal solution to introduce your students to twin-engine operation and procedures.

Twin piston based on the PA-34 - FNPT II

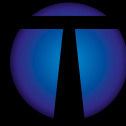

Single engine based on the TB20 - FNPT II

A single-engine aircraft largely used by schools for initial and instrument training.

Single engine based on the TB20 - FNPT II
